Product Designer with 6+ years of experience designing complex software. I'm passionate about interaction and visual design. I explore multiple approaches, prototype ideas, and focus on execution. I have a background in frontend and data visualization.

## experience

### Pleo • Product Designer

02/2022 - current (3 years 9 months) • Copenhagen

- Working in Invoices team, designing features which make finance processes more efficient and user-friendly.
- Led following projects:
- Designed approval workflows for invoice payments, making them more secure, without unnecessary friction. 38% of companies who use invoices use them on a daily basis.
  - Led the design of Purchase orders product from research to launch. Ran prototype testing and alpha tests with users, iterated with the dev team, and shipped a new product.
  - Partnered with lead designer, PM, and EM on long-term vision for Accounts Payables, exploring how to empower finance teams through automation.

### Issuu • UX Designer

09/2019 - 02/2022 (2 years 7 months) • Copenhagen

- Led the design of a canvas-based graphic editor giving publishers an easy way to repurpose their pdfs into social graphics. Created interaction patterns for working with images, text and colors allowing non-designers create powerful content.
- Together with lead designer reshaped the brand guidelines by introducing a new visual direction. Redefined colors, typography and core design system elements. The work was a foundation for the redesign of the whole platform.

### Designit • UX Design internship

03/2019 - 08/2019 (6 months) Copenhagen

First design role. Worked on UI design, user testing, and motion design across multiple projects.

### Dixa / CACHET / IBM • Frontend developer

07/2017 - 03/2019

Started my career as frontend developer building interfaces in React and focusing on design systems and css animations.

## skills

### design

End-to-end product design  
Interaction & motion design  
Prototyping & user testing  
Design systems & patterns  
Design research  
Journey mapping  
Figma

### programming

html / css / react / d3.js

## education

DTU  
MSc Digital Media  
Engineering

2017 - 2019  
Copenhagen

Thesis: Time-series data  
visualization in d3.js and  
python

AGH  
BEng Computer Science

2013 - 2017  
Kraków

### languages

polish (native) / english  
(fluent) / german (B1)

### interests

music / interior design /  
psychology
